

Timing chain kit PTA114-0130

Technical information for installation

Attention:

The timing chain kit PTA114-0130 contains two different sprockets for the oil pump - one with 23 teeth (Z=23) and one with 24 teeth (Z=24).

Only use the sprocket that corresponds to the number of teeth on the removed component.

Using a sprocket with a different number of teeth can lead to incorrect timing, engine damage and malfunctions.
